

**NORTH CALDWELL REGIONAL SCHOOL DISTRICT**  
**Annual Integrated Pest Management Notice**  
**For School Year 2018 - 2019**

Dear Parent, Guardian, or Staff Member:

This notice is being distributed to comply with the New Jersey School Integrated Pest Management Act. West Essex Regional School District has adopted an Integrated Pest Management (IPM) Policy and has implemented an IPM Plan to comply with this law. IPM is a holistic, preventive approach to managing pests that is explained further in the schools IPM Policy included with this notice.

All schools in New Jersey are required to have an Integrated Pest Management Coordinator (IPM Coordinator) to oversee all activities related to IPM and pesticide use at the school.

The IPM Coordinator for West Essex Regional School District is:

Name of IPM Coordinator: Taulant Feti

Business Phone number: 973-228-1200 Ex-1112

Business Address: 65 Greenbrook Rd. North Caldwell, NJ 07006

The IPM Coordinator maintains the pesticide product label, and the Material Safety Data Sheet (MSDS) (when one is available), of each pesticide product that may be used on school property. The label and the MSDS are available for review by a parent, guardian, staff member, or student attending the school. Also, the IPM Coordinator is available to parents, guardians, and staff members for information and to discuss comments about IPM activities and pesticide use at the school. Currently the school district uses Tri-Us for pest control in the school buildings. In the past year it was necessary to apply high level of treatment that would require notification to the public as required by law. There were no specific treatment schedule this past school year.

As part of a school pest management plan West Essex Regional School District may use pesticides to control pests. The United States Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (DEP) register pesticides to determine that the use of a pesticide in accordance with instructions printed on the label does not pose an unreasonable risk to human health and the environment. Nevertheless, the EPA and the DEP cannot guarantee that registered pesticides do not pose any risk to human health, thus unnecessary exposure to pesticides should be avoided. The EPA has issued the statement that where possible, persons who are potentially sensitive, such as pregnant women, infants and children, should avoid unnecessary pesticide exposure.

A copy of West Essex Regional Board of Education's Policy #7422-School Integrated Pest Management Plan can be accessed on our district's website at: [www.westex.org](http://www.westex.org).
